

# Ticket Console K'824

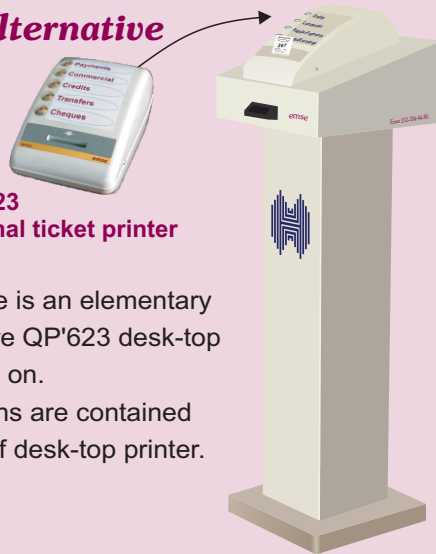

**Aesthetic and orthopedic Queue Ticket Dispenser...**

Systems include either a "Kiosk" or "Console" as ticket dispenser. Kiosk includes a computer, a touch monitor, printer and peripherals. While, Ticket Dispenser Console contains just a printer and service select buttons. The name "Console" refers to metal pedestal.

## K'623 Console

**Cost saving alternative**

**QP'623 thermal ticket printer**

K'623 model console is an elementary metal pedestal where QP'623 desk-top printer unit is placed on. Service select buttons are contained on upfront surface of desk-top printer.

- ➡ Looks similar to Smart Kiosk concept (just slimmer).
- ➡ Printer unit is embedded into metal body.
- ➡ Service select buttons placed on front window.
- ➡ Replacable "service name banner" in front window.
- ➡ Powder paint color options upon mass quantity order.
